

## Canton Public Schools

1:1 Full Time Paraeducator positions\*. Experience in Applied Behavior Analysis and Discrete Trial Instruction

### JOB DESCRIPTION:

The qualified candidate will provide direct one-on-one behavioral interventions to teach communication, social, and daily living skills and reduce problematic behaviors in the home, community, and school settings. The qualified candidate will utilize interventions developed out of the science of Applied Behavior Analysis.

Responsibilities will include:

- Prompting safe and socially acceptable replacement behaviors in order to build a repertoire of communication, social interaction, and problem solving skills
- Fading prompts appropriately to promote both successful and independent responding
- Increasing the frequency or duration of safe and appropriate replacement behaviors by providing access to reinforcers.
- Accurately collecting behavior data including: A-B-C, count, frequency, duration, latency, inter-response time, event, and interval based recording
- Following Individualized Education Program (IEP) goals and objectives and Behavior Intervention Plan, under the direct supervision of a certified staff member and the Board Certified Behavior Analyst.
