

Board Certified Behavior Analyst – BCBA School Based Position

Connecticut Behavioral Health, LLC is seeking a Master's or Doctoral Level Board Certified Behavior Analyst (BCBA) who possesses a strong behavioral background and training to develop classroom-wide Autism Programs and provide functional behavioral assessments and behavioral intervention programs on a consultative basis to school districts as well as to develop in-home behavioral programs for individuals on the Autism spectrum. Experience providing social skills training to individuals with Autism Spectrum Disorders is also desired. Excellent opportunity to work beside licensed psychologists and behavior analysts. Competitive Compensation and Benefits.

General Responsibilities

- Complete Behavioral Assessments to include Functional Assessments.
- Develop individual goals and objectives to be included in the clients' Initial Treatment Plan.
- Develop written guidelines for behavioral intervention/maladaptive behavioral reduction and skill acquisition plans/programs.
- Provide training (to families, staff, team members, and individual/agencies contracting for training) in behavioral interventions and applied behavior analysis as assigned by the Executive Director.
- Develop periodic progress reports.
- Analyze data collected on a weekly basis to determine the client's behavioral intervention/maladaptive behavioral reduction and skill acquisition plan/program effectiveness.

Job Requirements:

- BCBA credentials
- Excellent attention to detail
- Strong organizational skills
- Exceptional written and verbal communication skills
- High-level problem solving abilities
- Ability to skillfully manage staff

About Us:

Connecticut Behavioral Health is a leading provider of ABA therapy services for children, adolescents, and families who are on the autism spectrum. Our team of highly skilled therapists and clinicians are committed to helping our children, adolescents, and families achieve the highest level of success with the goals we collaboratively work on with them. We build partnerships with our families so that they feel equally invested in the success of the programs we build for them.

At CBH, we are able to provide a unique approach to supporting individuals and families as our staff consists of BCBA's, Clinical Psychologists, LCSW's, and LPC's. By having a wide variety of

clinical specialties with our practice, we are able to provide comprehensive assessments beyond what is typical in an ABA practice, allowing for a more individualized and specialized approach to treatment.
